

TECH YOUR PLANTER

Ag Leader's SeedCommand® lineup offers a range of planting technology to meet the individual needs of your farm operation with complete planter control and visibility from the InCommand® Go 16 display.

Shown on the InCommand Go 16

SureSpeed®

SureSpeed provides unparalleled singulation and spacing accuracy at any planting speed up to 12 mph for the ultimate plant stand and performance.

SureForce®

SureForce instantly adjusts pressure for precise planting depth with powerful downforce and uplift. Adapt to soil types, compaction, and planter weight to overcome diverse and tough environments.

SureDrive®

SureDrive provides precise and efficient planting through individual row section control, variable rate planting capabilities, and turn compensation for consistent population around turns and contours.
